

Idesco Security Key Management

Idesco will code and ship you customer-specific, pre-configured, install-ready, security key-protected readers and transponders -
So you can focus on your core business.

Idesco manages:

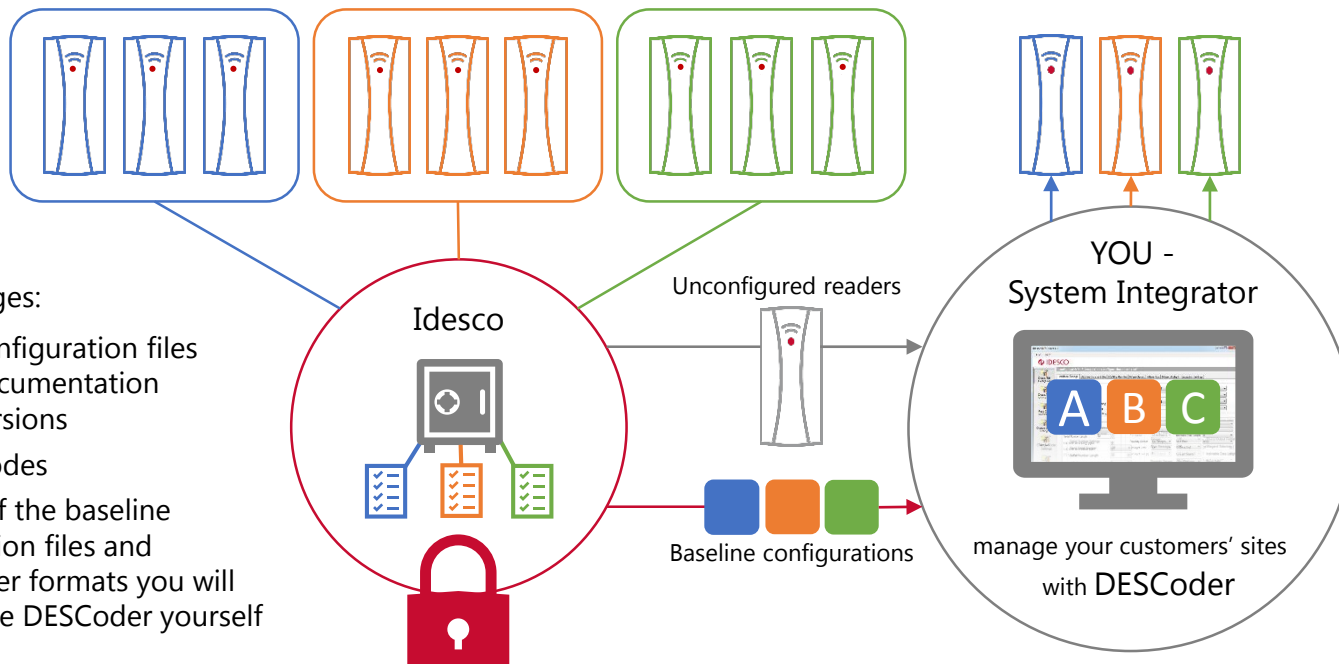

- Configuration files
 - Documentation
 - Versions
 - Storage
- Product codes
- Transponder databases

Idesco Security Key Management with DESCoder software*

* Includes a wide range of support, security – and freedom to choose which aspects you manage yourself.

Idesco ships custom-specified, default-configured, security-key protected readers, ready for you to install immediately.

Idesco manages:

- Default configuration files
 - Documentation
 - Versions
- Product codes
- Creation of the baseline configuration files and transponder formats you will need to use DESCoder yourself

DESCoder software lets you quickly configure your readers and transponders to individual end-users' sites. DESCoder also helps keep your stored, individual, configuration files secure.
