

# Idesco Mobile Cloud

Mobile identification application with BLE/NFC

Idesco Mobile Cloud is a convenient alternative for physical smart cards in access control. Idesco Mobile Cloud provides an easy-to-use mobile application for accessing buildings with a smartphone, and a cloud-based platform for convenient management of mobile credentials.

Idesco Mobile Cloud application stores user credentials to the mobile device securely as soft tokens which are authenticated by the access control reader. Application communicates with the readers either with secured NFC or Bluetooth low energy (BLE) interface.

Idesco Mobile Cloud application is compatible with Idesco Mobile Cloud service and 8 CD 2.0 MI series readers. Please learn more about 8 CD 2.0 MI readers in their datasheet, available in <https://idesco.fi/product/bluetooth-nfc-rfid-reader/>

## Technical specification

BLE / NFC requirements - Android	
Operating system	Android 5.0 or higher
Bluetooth	4.1 or higher
NFC	By Android: 5.0 or higher
BLE / NFC requirements - iOS	
Operating system	iOS 10 or higher
Bluetooth	4.1 or higher
NFC	Not supported by Apple
<b>Compatible RFID reader</b>	8 CD 2.0 MI
