# IDESCO

7 AH Configuration tool

Tool for configuring Idesco's 125 kHz readers

Features and benefits

- **Time-saver:** Fast, convenient, reader programming before installing
- **Powerful:** Create your own custom reader configurations as detailed as you desire
- **Enhance Security:** Custom configure parameters to stymie cloning and tampering

7 AH Coder software opens up the full spectrum of configurable features exploitable in your Access 7 AH reader. This convenient, user-friendly application enables you to deeply configure your reader precisely to the parameters you've chosen (from the w i d e variety available) before installing it. Parity, data length, Clock & Data, LED colour, buzzer mode, optical tamper, the list is long – all are modifiable by AH Coder and can help enhance your reader's security.
