

Idesco ID: Entry Level

New mobile credentials to your system
on demand

Idesco ID Entry Level is the simplest and fastest method to start using mobile access. It is a convenient option to organisations who don't need to send mobile credentials to users' phones remotely. Mobile credentials are enrolled to system on demand from phones that have Idesco ID application installed. Installation of Idesco ID mobile app creates a device ID in the phone. This device ID functions as phone user's mobile ID of a user when enrolled into the access control system from their phone. Enrollment is done by specific Enrollment Station device, connected to a PC via USB interface. Then, the new mobile credential is managed in the access control system just like its other access credentials.

- No parallel system needed for mobile credential management
- Free Idesco ID mobile phone app
- The same app can provide access to several sites
- Idesco ID mobile phone app is available for both Android and iOS devices
- Compatible with 8 CD 2.0 MI readers installed in your system

What is needed?

Compatible RFID reader	8 CD 2.0 MI
Reader device to enroll mobile ID to the system	Enrollment Station
Mobile phone app	Idesco ID (Google Play or AppStore)
