

Factors to consider for

Choosing the right RFID reader

Contents

| | | |
|-------|---|----|
| 1 | Introduction | 4 |
| 2 | Requirements of your setting..... | 4 |
| 2.1 | Reading distance and frequencies..... | 5 |
| 2.2 | Interfaces | 5 |
| 2.3 | Temperature | 5 |
| 2.4 | Shock, vandalism and wear | 5 |
| 2.4.1 | Tampers..... | 6 |
| 2.5 | Moisture, dust and chemicals | 6 |
| 2.6 | Metal surfaces | 7 |
| 2.7 | Installability | 8 |
| 2.8 | Readers' appearance and design..... | 9 |
| 3 | Access control..... | 9 |
| 3.1 | Security | 10 |
| 3.1.1 | Secure card-reader communication – MIFARE DESFire | 10 |
| 3.1.2 | Transparent readers..... | 11 |
| 3.1.3 | Secure reader-host communication – OSDPv2 | 11 |
| 3.2 | Open standard or proprietary technology?..... | 12 |
| 3.2.1 | Security keys..... | 12 |
| 3.3 | Access Control Identification protocols..... | 13 |
| 3.3.1 | Cards and transponders | 14 |
| 3.3.2 | Powerful security enhancement: Pin Codes | 14 |
| 3.3.3 | Mobile credentials..... | 15 |
| 3.4 | How to migrate to mobile identification? | 15 |
| 3.4.1 | Mobile credential management | 16 |
| 3.5 | Access control and cyber security | 16 |
| 3.5.1 | NIS2 and two-factor authentication | 17 |
| 3.6 | Interactive identification solutions | 17 |
| 3.6.1 | Readers for settings with tags triggering applications..... | 17 |
| 3.7 | Accessibility | 18 |
| 3.8 | Combining Time & Attendance with Access Control | 19 |

Sales & Marketing | How to choose the right RFID reader | Version 1.06 | Public
