

Idesco ID

Convenient mobile ID management and distribution without license fees.

Entry Level is an easy solution for on demand mobile ID's.

Enterprise Level enables sending mobile ID's to larger amount of users simultaneously, or as ongoing 24/7 service.

01 Entry Level

With Enrollment Station tool, enroll mobile ID's to your system from a phone with Idesco ID app.

For businesses who need new mobile ID's only occasionally.

Just add a mobile ID to your system, no other integrations needed.

Free Idesco ID app

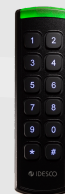

8 CD 2.0 MI

Bluetooth readers

Three security levels to access:

- Hands-free
- Choose door in app
- Unlock phone's locking screen

You can use mobile ID's alongside MIFARE DESFire tags

Configure reader settings and Bluetooth reading distances with Mobile Coder app

02 Enterprise Level

Option 1:

Send mobile ID's to your users' phones via Idesco Portal, from your own customer account.

Option 2:

Send mobile ID's to your users' phones via your own solution, with REST API commands. This option requires a REST API integration between Idesco ID and your solution.
